

SU Web Development Internship

By Katie Snyder

The Web Office

- The Web Office – creates and maintains SU webpages and forms
 - Todd & Dave – Web Developers
 - Andrew – Assistant Web Developer
- On the second floor of Holloway Hall in Publications

My Tasks

- Completing and keeping track of web requests.
- Basic content and archive updates.
- Creating pages for faculty/groups.
- Moving old pages into new CMS (Content Management System).
- Communication with coworkers and customers.

Challenges

- Learning to use HTML and CMS for content updates
- Learning to use Javascript, JQuery and CSS for updating existing forms
- Learning to communicate effectively with personnel over the phone
- Learning to use Google Developer for debugging code

Classroom Experience

- Had some html experience in Community College
- COSC 220: OOP and debugging

What Have I Learned

- How to effectively communicate with clients.
- Confidence in my knowledge of HTML
- Becoming comfortable in navigating through a large website to make changes.
- How to work backwards from existing code to understand/edit
