Challenges

- Communicating with clients and maintaining a schedule/spreadsheet
 - Clients often had questions about the process and conflicts with certain dates that would have to be worked around
 - Many clients didn't respond to emails
 - Numerous meetings with clients addressing specific issues
- Learning new technologies
 - Encountering new things in Javascript
 - Sharepoint and associated technologies (nintex, workflows) were new to me
 - Finding ways to do things in Nintex that weren't inherently supported

Challenges

- Pacing work
 - Extremely variable work times due to client response and migration time
 - Occasionally meetings would cut into projected schedule and would have to reschedule clients
 - Side tasks which often presented more of a challenge had to be put aside at times due to meetings, client issues, etc.
- Keeping work organized
 - Information on over 300 sites to be maintained in spreadsheet
 - This had to be updated for every migration as well as detailing any errors and trying to fix them
 - Migrated 100 sites but had to track previous sites too

Conclusion

- Learned new technologies and their implementation
- Insight into division of labor in a large company
- Multitasking proficiency
- Business world experience
