

Computer Science 380 Internship Presentation

By: Ryan Poholsky

Introduction

- Erickson Living Corporations
- Started in 2019
- Work from school twenty hours a week
- Paid internship

Project 1 - Covid Contact Tracing

- At the beginning of Covid-19
- Main goal of project - Be able to contact trace every employee/resident to ensure safety.
- I worked on database management and website design
- Used languages such as MySQL, HTML, PHP & CSS

Project 2 - Redesign of Website

- Goal: Complete redesign of website allowing new features and a cleaner design
- Used HTML, CSS, Javascript and PHP
- My job: To redesign menu page along with the update of meal macros
- Data entry into new database

Challenges

- Working from home can cause communication issues
- Had to learn languages on my own time
- Speak up/Ask questions
- Time management

Experience Acquired

- Work helped in the classroom
- Online & group communication/team skills
- How corporate level databases/code works
- My passion in Computer Science
