NOTES:

Courses in **bold** must be completed before the fall of the junior year. The exact sequence shown is NOT a requirement for entry into the program. Courses CAN be in progress during the semester of application to the MLS Program (spring sophomore year). This course sequence was developed to assist students interested in healthcare graduate school and includes many courses not required for the MLS Program. It covers many popular options, but not all. Students will need to craft their own 4-year plan with an advisor based on their aspirations. Admission to the MLS Program is competitive, and admission to the University does not guarantee acceptance to begin upper-division MLS courses. Contact the program director for additional clarification. Transfer students and medical laboratory technicians should seek individual advisement from program faculty to prevent duplication of course work and/or experiences.
