SALISBURY
UNIVERSITY

HITTING THE GROUND RUNNING

Salisbury University's Geography and Geosciences Department produces career-ready graduates. From chasing tornadoes in Colorado during a National Science Foundation research program to mapping power grids in hurricane-ravaged Puerto Rico, students and alumni are putting their skills to humanitarian use. Other efforts include:

- ▶ Creating apps and maps for NASA
- ▶ Helping towns assess housing blight
- ▶ Mapping the depths of Africa's Lake Victoria
- ▶ Developing flooding/land preservation plans
- ▶ Inventorying a national arboretum

FACULTY SAY: *“Such experiences give our students an edge when applying for acceptance into graduate programs and competing for assistantships and fellowships across the country.”*

SALISBURY UNIVERSITY

18 YEARS OF DEDICATED SERVICE

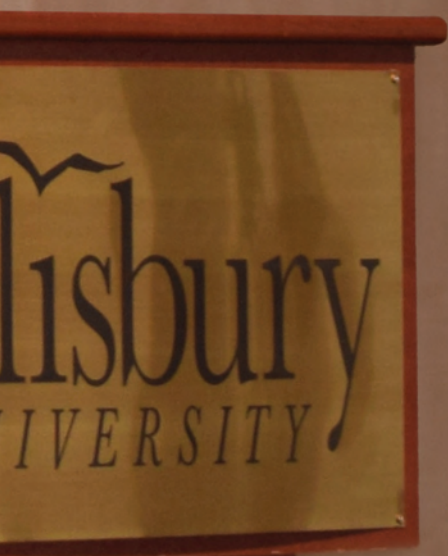

SALISBURY
UNIVERSITY

The longest-serving female president in the University System of Maryland, Dr. Janet Dudley-Eshbach is stepping down as SU's leader this year. She has strategically reshaped the campus as a champion of diversity, international education and academic excellence. Thanks to her global vision, SU has grown in size, stature and reputation with:

- ▶ Enrollments up 30 percent to over 8,700
- ▶ A transformed campus skyline with over \$350 million in new facilities
- ▶ New academic programs, including two doctorates
- ▶ Millions more in private support, with Foundation assets up 175 percent
- ▶ Expanded community partnerships

DUDLEY-ESHBACH SAYS:

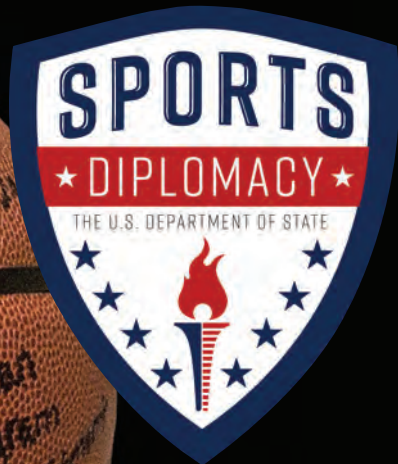

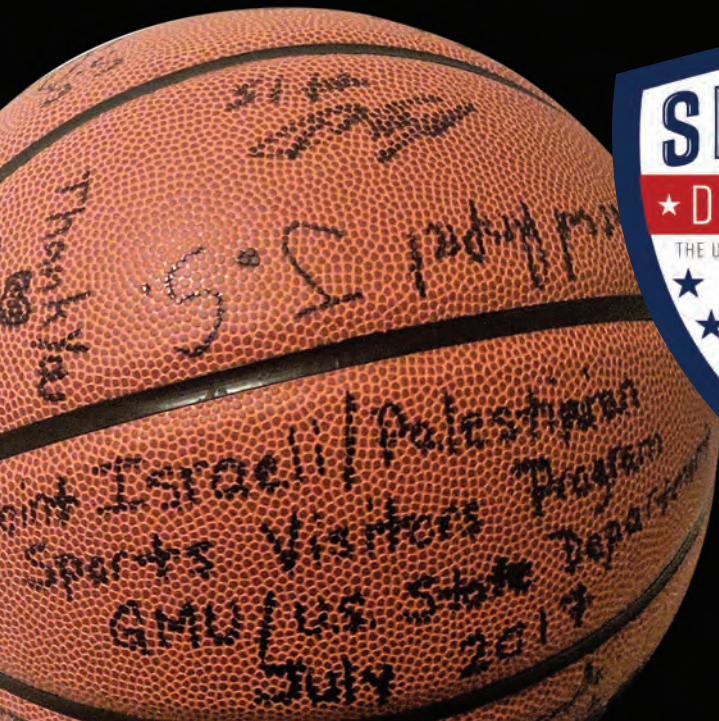

“The University was strong when I first assumed the presidency, and we are much, much stronger today because of the teamwork of a generation of faculty, staff, students, alumni and private donors. People support what they help to create. Together we built a vision and then made it a reality.”

PEACEBUILDING THROUGH SPORT

Salisbury University's Dean Ravizza is heading to Thailand on a Rotary International Peace Fellowship to expand the use of sports to unite people across war zones and ideological divides. Inspiring students studying health/sport sciences and conflict resolution, Ravizza's work has involved:

- ▶ Youth refugees in the Rwandan genocide
- ▶ Child soldier reintegration in Africa
- ▶ Refugee resettlement in Europe
- ▶ Sports diplomacy for the U.S. State Department
- ▶ Countering new forms of youth violence
