

Your Major ... And More

Ranked among the top 15% of U.S. universities for return on investment by Georgetown University's Center on Education and Workforce, Salisbury University aims to provide you a quality and comprehensive education that prepares you for entering the workforce and all that lies beyond earning your diploma. Most of our majors have been designed with a variety of tracks to allow you to really focus your experience. We also offer over 90 minors so you can enhance your major with a complementary area of study or explore a minor that really interests you to expand your horizon as you take steps toward making tomorrow yours.

Majors & Tracks

Salisbury University has over 50 undergraduate degree programs, with many of our departments offering designated tracks within their majors to allow you to focus your study and gain a more in-depth understanding of your discipline. Check out what we are currently offering - and stay tuned, we are adding new tracks to our majors nearly every academic year. Find your distinct path to success through SU's majors and tracks.

- Design & Production
- Performance

Urban & Regional Planning

- Environmental Planning
- Land Use Planning

Minors

Beyond those that are broader studies of our major disciplines, many of our minors are where faculty are showing their innovation and responsiveness to the ever-changing global career landscape. In recent semesters, SU has introduced minors ranging from explorations of distinct populations through disability and Africana studies minors to introductions to the natural and virtual world through marine science and user experience (UX) minors. Much like our tracks, our minors are responsive to the needs of our students and the world – who knows what new minor will be created next!

- Accounting
- Actuarial Science
- African Area Studies
- Africana Studies
- American Studies
- Anthropology
